

Animation

This shows how to animate a rotating square in PostScript by drawing a slightly different figure on successive pages.

```
%!
```

```
% animate.ps
```

```
/build-square {
```

```
0 0 moveto
```

```
1 0 lineto
```

```
1 1 lineto
```

```
0 1 lineto
```

```
closepath
```

```
}
```

```
def
```

```
/page-setup {
```

```
72 dup scale
```

```
0.02 setlinewidth
```

```
4.25 5.5 translate
```

```
} def
```

```
% - the animation begins -----
```

```
% - the square rotates and so do the colors
```
